

1 Overview

The package dosecalc implements the dosing method for adult patients.

2 Functions

The function `dose_by_weight` multiplies the body weight by the dose rate of 15 milligrams per kilogram and never returns more than 4000 milligrams.

The function `adjusted_dose` multiplies the dose by the factor of the clearance band.

Factors held in the package

Band	Factor
Normal	1.00
Reduced	0.75
Low	0.50
